Description

It would be nice if we could have an admin UI to enable or disable stock and custom fields for display on email notifications.

On our system we currently see these fields for issue notifications:

- Author
- Status
- Priority
- Assignee
- Category
- Target version (if though we don't use it)
- Resolution (custom field)
- Documented (custom field)

If such a feature existed I would use it to disable displaying the Target version field and enable displaying the Due date if it is set.

Thank you for your time.
