Resolution:			
Description			
<p>It would be nice if we could have an admin UI to enable or disable stock and custom fields for display on email notifications.</p> <p>On our system we currently see these fields for issue notifications:</p> <ul style="list-style-type: none">- Author- Status- Priority- Assignee- Category- Target version (if though we don't use it)- Resolution (custom field)- Documented (custom field) <p>If such a feature existed I would use it to disable displaying the Target version field and enable displaying the Due date if it is set.</p> <p>Thank you for your time.</p>
