Category:	Wiki	Estimated time:	0.00 hour
Target version:	2.5.1	Affected version:	2.4.4
Resolution:	Fixed		

Description

Hi,

tonight the YandexBot visited our Redmine installation and queried for the first version of a non-existing wiki page (for whatever reason). The URL it requested looked like

```
https://redmine.server.de/projects/myproject/wiki/DoestNotExist?version=1
```

The same occurs for

```
https://redmine.server.de/projects/myproject/wiki/DoestNotExist/1
```

The exact error is

```
NoMethodError: undefined method `versions' for nil:NilClass
app/models/wiki_page.rb:107 content_for_version
app/controllers/wiki_controller.rb:69 show
...
```

Our environment is

Environment:

```
Redmine version      2.4.4.stable
Ruby version         2.0.0-p353 (2013-11-22) [x86_64-linux]
Rails version        3.2.17
Environment          production
Database adapter     PostgreSQL
```

SCM:

```
Subversion           1.6.17
Mercurial             2.2.2
Git                   1.7.10.4
Filesystem
```

Redmine plugins:

```
redmine_wiki_extensions 0.6.4
```

Although this is not a big issue, I would like Redmine to return a 404 error instead.

Associated revisions

Revision 12971 - 2014-03-15 12:41 - Jean-Philippe Lang

Fixed that requesting a specific version of a non-existent wiki page raises an error (#16255).

Revision 12979 - 2014-03-17 09:30 - Jean-Philippe Lang

Merged r12971 (#16255).

History

#1 - 2014-03-12 09:27 - Björn Peemöller

Today I could reproduce this bug with Redmine 2.5.0.

#2 - 2014-03-15 12:41 - Jean-Philippe Lang

- *Status changed from New to Resolved*
- *Assignee set to Jean-Philippe Lang*
- *Target version set to 2.5.1*
- *Resolution set to Fixed*

Fixed in [r12971](#), thanks for pointing this out.

#3 - 2014-03-17 09:30 - Jean-Philippe Lang

- *Status changed from Resolved to Closed*

Merged.
