| **Target version:** | | | | |
| **Resolution:** | Invalid | | **Affected version:** | 2.4.2 |

**Description**

Following #16161, I tried to apply the patch as per r12491 on my 2.4.2 installation, with no luck; then, without patching as seen at
http://www.redmine.org/projects/redmine/repository/revisions/12941/diff/trunk/app/views/issues/_form.html.erb
but just disabling the "read only" attribute for the standard tracker, it works like a charm (but it's not a good solution, only a workaround).

Why shouldn't it work just adding that line in _form.html.erb? Is there something wrong with 2.4.2? I know new versions fix it, but I can't update now.

thank you

*- Status changed from New to Needs feedback*

As JPL said at #16161#note-3, please try this out without any plugin.

*- Related to Defect #16161: Parent task search and datepicker not available after changing status added*

**#3 - 2014-03-14 11:13 - Daniele Pedroni**

I'm sorry but at this point I can't test it without plugins, I can't stop or disturb our production Redmine environment.
I hope someone else who may experience the same behavior will do it.

thank you Toshi.

**#4 - 2016-12-25 10:15 - Go MAEDA**

*- Status changed from Needs feedback to Closed*

*- Resolution set to Invalid*

Since current versions of Redmine include the changes made by #16161, no need to apply the patch. Closing.
