Redmine - Defect #1637

Repository module showing error

2008-07-14 13:08 - Liju Mathew

Status:	Closed		**Start date:**	2008-07-14
Priority:	Normal		**Due date:**	
Assignee:	Jean-Philippe Lang		**% Done:**	0%
Category:	SCM		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	

Description

My repository module still showing the error "Entry and/or revision doesn't exist in the repository"while clicking on it.

My subversion is 1.4.5 and rails is 2.1.0 version. I can able to check the repository manually and also can able to integrate it with local redmine.

Whenever I try to checkout from the terminal, I got the following error. This problem exist only on server and repository is also working well.

svn co http://subversion.mydomain.com/myproject/
svn: The path was not part of a repository
svn: PROPFIND request failed on '/'
svn: '/' path not found

Pls guide me.

Thanks,
Liju
