Category:	Translations		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Duplicate		**Affected version:**	

Description

$ ruby script/about

Environment:
Redmine version   2.3.4.stable
Ruby version   2.1.0-p0 (2013-12-25) [x86_64-linux]
Rails version   3.2.13
Environment   production
Database adapter   Mysql2

The problem is best illustrated by the provided screenshot. I've found no reference only about this particular problem, besides that there is 1 site which also displays this particular way for me.

Do note that this **does not** happen on any windows browser that is viewing the login portal: the problem is **exclusively** Linux and the way Linux browsers (Chrome/Firefox) probably "tell" which language they are using.

Obviously (since displayed correctly under Windows) there is nothing wrong with the translation files.

History

#1 - 2014-04-23 06:02 - Toshi MARUYAMA

- Status changed from New to Closed

- Resolution set to Duplicate

Redmine i18n does not depend on browser.
It seems you did not clear cache.
See [#13520#note-12](#).

#2 - 2014-04-23 06:02 - Toshi MARUYAMA

- Is duplicate of Defect #12900: Template::Error (translation missing: en.date.formats.default) added
