<b>Resolution:</b>	Fixed		
<b>Description</b>			
<p>When writing a new news entry which has a wiki link in it, the wiki link does not show in the preview, though it does when the news item has been published. I would expect the wiki link to show up in the preview. As it is, the text shows up, but it's not a link. For instance, <code>[[Build process]]</code> shows up as "Build" in the preview, though it shows up as a link to the "Build" wiki page as the text "process" when published.</p> <p>Running Redmine 0.7.2.</p>
