## Redmine - Defect #16755

# Field set as read-only still available in the issues list context menu

2014-04-25 17:15 - Ty You

Status: Closed Start date:

Priority: Normal Due date:

Jean-Philippe Lang

Category: Issues workflow Estimated time: 0.00 hour

Target version: 2.5.2

Resolution: Fixed Affected version: 2.3.2

## **Description**

Assignee:

I have created a custom field and set it to be read-only for my "Client" role across all statuses. When a user is assigned to (only) this role and updates a ticket the field no longer shows, as expected. However, the same user can still change the field from the context menu on the main issues list.

% Done:

0%

I am using 2.3.2.stable, any suggestions?

#### **Associated revisions**

### Revision 13124 - 2014-05-02 09:32 - Jean-Philippe Lang

Field set as read-only still available in the issues list context menu (#16755).

#### Revision 13161 - 2014-05-24 18:36 - Jean-Philippe Lang

Merged r13124 (#16755).

#### History

#### #1 - 2014-05-02 09:33 - Jean-Philippe Lang

- Subject changed from Field set as read-only still available to edit in issues list context menu to Field set as read-only still available in the issues list context menu
- Status changed from New to Resolved
- Assignee set to Jean-Philippe Lang
- Target version set to 2.5.2
- Resolution set to Fixed

The field shows up in the context menu but the update would not work anyway.

This is fixed in <u>r13124</u>, thanks for pointing this out.

# #2 - 2014-05-24 18:36 - Jean-Philippe Lang

- Status changed from Resolved to Closed

Merged.
