<b>Description</b>			
Redmine v2.5.1			
When using			
<pre>{{thumbnail(filename.png)}}</pre>			
in a comment, the email sent to notify related users does not show the image. The <code>&lt;img&gt;</code> source starts with <code>/attachments</code> . This is because relative url is used in <code>thumbnail macro</code> when processing the text.			
To fix this, we should use the <code>url_for</code> argument <code>:only_path =&gt; false</code> , so that the generated urls are absolute.			
The fix is in the patch and we are using it confidently in our system.
