Target version:			

Description

With moving from trac needed some more macros for linking issues back to wiki pages to show queue sizes, new tickets waiting in a area etc. issue_list Lists Issues matching a list of given parameters

```
!{{issue_list(tracker,category,status,user,max) }}
```

issue_count, Count number of issues matching a set of filters (tracker,owner,category,status currently supported as filters)

```
!{{issue_count(tracker=xxx,category=xxx,status=xxxx)}}
```

issue_query: Same as issues_count be returns lists and not single count

```
!{{issue_query(tracker=dddd&category=dsdd&status=dddd&owner=ssss&max=10)}}}
```

Also with more of wiki pages across had problems with lose of TitleIndex function so re-implement this for redmine. I Have added ability to create a number of styles of list.

title list: Inserts an alphabetic list of all wiki pages into the output. Appears as a unordered list

```
{{title_list(title-prefix)}}
```

title_menu: Inserts an alphabetic menu (toc style) of all wiki pages into the output. This uses the toc css to produce a nice side menu to link groups of pages together.

```
{{title_menu(title-prefix,level,max,css-sytle)}}
```

title_bar: Inserts an alphabetic menu of all wiki pages into the output. This is basically aimed a across the screen menu with details menu currently styled as a table to our old trac navigation.

```
!{{title_bar(title-prefix,level,max,css-sytle)}}
```

title_index: title_index boxed up titles by letter to create a glossary or index. Use this for generation of a glossary and for larger indexes of pages.

```
!{{title_menu(title-prefix,columns,max)}}
```

History

#1 - 2008-07-28 18:34 - Robert Shell

Have a update of trac loader rake task to follow, just have a few more conversions to automate. Just dealing with n x trac to 1 redmine issues with ticket numbers.

#2 - 2008-11-08 16:33 - Robert Shell

- File macros.rb added

Enhanged and fixes a number of the marcos.

Hi Robert,

take a look at #2114.

Kind regards Karl Heinz Marbaise

#4 - 2011-12-05 10:20 - Etienne Massip

- Subject changed from Support for extra macors to aid in move from trac to Support for extra macros to help in move from trac
