

Redmine - Feature #1709

editing original issue submission

2008-07-29 18:31 - Carl Nygard

Status:	Closed	Start date:	2008-07-29
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:			
Resolution:	Invalid		

Description

It was once possible to edit the original issue submission text, in case of error or mis-spelling etc. When the edit/comment functionality was merged into the Update button, the ability to edit the issue description was lost.

I would like the edit description functionality to be returned, and only active for an administrator or the original bug submitter. It would be nice if the pencil icon appeared like it does for editing individual comments.

History

#1 - 2008-07-30 20:35 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Invalid

Actually, this functionality was not lost, but I agree, a bit difficult to find.

On the issue edit form, click **More** (you can see this link in the fieldset label, just after **Change properties**).

Report any idea here: [#1487](#).

Different than described here?

<http://www.redmine.org/boards/2/topics/show/1133>

Or is it a UI issue?

I need to be able to modify the original reporter/author. But I haven't found a feature request or discussion for that yet.

Same.

I need to be able to modify the original reporter/author. But I haven't found a feature request or discussion for that yet.

You can't edit the original reporter/author but that's different than what this Feature is asking for.

Hey!

Just want to update.

The function of editing the original post created by the author is available by clicking the 'Edit' button (with a pencil icon) next to the 'Description' in the Editing Form. Tricky ha
