<b>Description</b> This patch closes both <a href="#">#328</a> (put the fact of description change to issue history) and <a href="#">#746</a> (visualize description change). It goes rather simple path and relies on availability of 'diff' utility (not a problem in many cases).  I just upgraded JournalDetails' values to :text field type (from :string of 256 symbols); better approach might be introducing Issue versioning with acts_as_versioned and making JournalDetails refer to previous and next versions of issue; but I thought this would be too heavy for this patch and better would be another improvement (if needed). See the plugin-announcement by Aleksander Palyan in [note-12](#) of issue [#746](#) which might solves this issue without hacking the core.
