

## Redmine - Feature #17500

### Visibility/Use-ability/Creation Settings for Issue Trackers per Role per Project.

2014-07-18 18:15 - James H

<b>Status:</b> New	<b>Start date:</b>
<b>Priority:</b> High	<b>Due date:</b>
<b>Assignee:</b>	<b>% Done:</b> 0%
<b>Category:</b> Issues permissions	<b>Estimated time:</b> 0.00 hour
<b>Target version:</b>	
<b>Resolution:</b>	
<b>Description</b> Requesting feature for allowing setting visibility and use-ability settings for Issue Trackers per role per project.  Would like to have a way to: <ul style="list-style-type: none"><li>• Allow only certain roles to create certain issue tracker issues for a particular project.</li><li>• Allow certain roles the ability to "edit" or "update" that particular issue tracker type.</li><li>• Allow certain roles the ability to view that particular issue tracker type.</li><li>• Disallow certain roles from being able to view that particular issue tracker type.</li></ul>

I fully support this.

In our organisation we do have a project with feature and defect and we would like the role tester can ONLY create defect type ticket and not feature.

- Related to Feature #17499: Issues Do Not Copy when Issue Tracker is Disabled from "Copy From" Project added

#### #4 - 2014-09-23 15:02 - Benedikt Aufermann

I support this also.

We want to have a full transparency until a certain level. But the concrete "Tasks" for a person should not been seen by a bigger audience.

Hi All,

I think tracker wise control can be handled through this plugin [http://www.redmine.org/plugins/redmine\\_track\\_control](http://www.redmine.org/plugins/redmine_track_control)  
As this is a plugin and not a core part of redmine, but for the time being, this plugin will quench your thirst.

Hi Toshi MARUYAMA,

It is my humble request to include this in redmine core asap.

[Lajish Lakshmanan](#)

Have you tried the plugin? If so, what version of redmine?

I for one, cannot get those plugins to work on any of the newer versions.

I didn't try it. But I will test it in my Test Server and let you know about its status very soon.

Hi there,

I tried this plugin in 2.4.2 & 2.5.2 version and it worked fine. This plugin helps you to set role wise control over tracker creation...)

**#9 - 2014-09-25 18:51 - James H**

Hmm.. I tried it on those versions..

I get errors when trying certain things; and when creating issues, it behaves oddly. I cannot get it function correctly. The names of the trackers also is bugged, but thats just cosmetic.

You have tried testing out creating issues with different users/roles?

Installation of the plugin goes smoothly, but the actual functionality with redmine as a whole does not work for me.

FTR: [#285](#) does already great part of this feature (except "per project")
