<b>Description</b>			
A number of different tickets have fields that are not editable. Affected fields are 'Priority', 'Start date', 'Due date' and 'Estimated time'.			
Priority is greyed out. The other fields show no value at all when in the edit mask wether the field is filled or not.			
I am using my administrator account with full access, so I don't think it is a permission issue.

It is not a parent issue.  
It is not linked to any other ticket.
