Redmine - Defect #17579

Edit Watchers List Loses Checked Watchers When Performing Multiple Searches

2014-07-29 14:44 - Brandon Liles

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Issues		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Duplicate		**Affected version:**	2.4.2

Description

When editing the watchers list on an issue, if you search for a user, click their name but do not click "Add", and then perform a new search, the clicked contact is lost.

It would be more intuitive if checked watchers were not lost by doing a new search. The search could filter the user list client-side instead of requiring server round trips, and this would prevent the clicked contacts from being lost.

+1 in 2.6.0

I think it would be good if either the system "remembers" previously checked options or the system adds or removes watchers in "real-time" as the user is clicking.

#4 - 2016-11-11 14:53 - Luka Lüdicke

I tested the patch from #17071#note-1 (which is two years old) and it fixes the issue. When will it be applied?

btw: that is a good example where the select2 widget could provide a elegant solution https://select2.github.io/examples.html#multiple

- Status changed from New to Closed

- Resolution set to Duplicate

I've added some proposals to fix this behaviour in #28771.

I'm closing this ticket as duplicate of #17071.
