Description

I didn't find this in features or in plugins.

The guys from EasyRedmine did great job, but when I contacted them, they said that Calculated (computed) custom fields supported only EasyRedmine, it doesn't work with Redmine-Core. It's really pitty.

1. develop or adapt Calculated (computed) custom fields (scren) for Redmine-Core
2. Improve functionality. Add calculation by taking a sample of data from other issues(custom fields,fields).
Because now, (1) calculate data only from 1 issue. We need

For example We have issue with tracker "Invoice" and custom fields: a) invoice_income, b) invoice_expences
And We have issue "Contact" with custom fields %Revenue_per_month
Please see exampleexample

"%Revenue_per_month" = "1) Σ[%{cf_12(invoice_income)}] / 2) Σ[%{cf_11(invoice_expences)}]",
WHERE:

a) Σ[%{cf_12(invoice_income)}]
A SUM of all invoice_income filtered by:
invoice_date: between 01.07.2014 and 31.07.2014
invoice_status: payed

See the screen

b) Σ[%{cf_12(invoice_expences)}]
A SUM of all invoice_expences filtered by:
invoice_date: between 01.07.2014 and 31.07.2014
invoice_status: payed

And one more detalization about what I want from itAnd one more detalization about what I want from it

If we add filter "payed",we'll get somethink like that:
"set_filter=1&f%5B%5D=cf_12&op%5Bcf_12%5D=%3D&v%5Bcf_12%5D%5B%5D=payed"
So 1) Σ[%{cf_12(invoice_income)}]
maby something like this:
Σ of all %{cf_12(invoice_income)} under "set_filter=1&f%5B%5D=cf_12&op%5Bcf_12%5D=%3D&v%5Bcf_12%5D%5B%5D=payed"

+1

#8 - 2015-01-19 14:53 - John Gordon

+1 see #17535
#17913 has been closed as a duplicated ticket but no further response provided here about the feature request given the Easy Redmine solution does not work on Redmine Core.

Thank you for your pointing out.

#13 - 2015-08-01 00:48 - Toshi MARUYAMA

- Is duplicate of Feature #1712: add custom fields that are calculations of other fields added

#14 - 2015-08-01 00:51 - Toshi MARUYAMA

And duplicate of #8177.

#15 - 2015-08-01 00:51 - Toshi MARUYAMA

- Is duplicate of Feature #8177: Custom Field with mathematical calculation added
