History

#1 - 2014-09-06 13:57 - Toshi MARUYAMA

- Target version set to 2.4.7

#2 - 2014-09-14 15:15 - Jean-Philippe Lang

- Status changed from New to Needs feedback

Thanks for this detailed report but I'm not able to reproduce this probelm with the permissions set as in your example.

#3 - 2014-09-16 16:48 - Jun NAITOH

I tried CentOS 6.0 i686 environment, now.

I reproduced Ruby-1.9.3-p392 and SQLite DB on Redmine 2.4.6. But I can't reproduced MySQL DB on Redmine 2.4.6.

It may be a problem which occurs in the SQL DB environment.

#4 - 2014-09-28 16:58 - Jean-Philippe Lang

Tested with ruby1.9.3 and SQLite and same permissions, works for me.

#5 - 2014-09-28 16:58 - Jean-Philippe Lang

- Target version deleted (2.4.7)

- Resolution set to Cant reproduce

#6 - 2015-08-23 17:03 - Jan Niggemann (redmine.org team member)

- Status changed from Needs feedback to Closed
