

Redmine - Feature #1766

Custom fields should become addable to Spent Time list/report

2008-08-11 18:46 - Mischa The Evil

Status:	Closed	Start date:	2008-08-11
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Time tracking	Estimated time:	0.00 hour
Target version:	2.3.0		
Resolution:	Fixed		
Description			
Like the subject states <code>timelog.custom_field</code> columns should become addable to the reports @ <code>/projects/xxxprojectxxx/timelog/details</code> .			
They are available already as filters in the 'Spent Time'-report view.

Associated revisions

Revision 10972 - 2012-12-09 22:03 - Jean-Philippe Lang

Makes time entry custom fields available for display on the time entries list (#1766).

Revision 11174 - 2013-01-12 14:09 - Jean-Philippe Lang

Makes issue custom fields available as timelog columns (#1766).

Revision 11459 - 2013-02-24 09:57 - Jean-Philippe Lang

Makes project custom fields available on spent time report (#1766).

History

#1 - 2008-08-12 12:07 - Daniel N

This would greatly improve the usability of the timelog feature. I also noticed that only "boolean"-type custom fields appear as filter in the drop-down for Spent Time reports. Could you confirm this? Or do all your custom fields are available?

#2 - 2008-08-12 12:11 - Daniel N

Duplicates [#1692](#) - Jean-Philippe explained that currently only boolean and list types are available.

#3 - 2008-08-13 01:51 - Mischa The Evil

I took the liberty to [follow-up the discussion](#) of this issue on the forums to keep the issue as concrete as possible... :-)

#4 - 2010-02-01 13:32 - Frédéric Moulins

The following patch allows to add comments to the list of fields : [#3117](#).

To add up to 5 fields to the report : [#4705](#).

Custom fields are already available, so the feature should be complete.

#5 - 2011-06-07 19:02 - Maciej Czub

There are many gaps (mainly in the aspects of custom_fields) in the functionality of:

- /projects/foo/timelog/details
- /projects/foo/timelog/report
- /time_entries
- /time_entries/report

Key function is to display the custom fields in the detailed views and reports. It's now only partially implemented in the timelog CSV export feature. There are also requests for filtering by custom fields in details and grouping by custom fields in reports.

It would be nice if these gaps in functionality have been filled.

#6 - 2011-06-07 20:09 - Jamie Gruener

Just to be clear, only *some* types of custom fields are available in the Report view. Specifically, text fields are not available, and I understand why, but that doesn't help folks who would like to see the data in Redmine (I stopped using Excel for a reason, folks!). Ideally, you could add additional fields to the Details view.

Still waiting for the solution!

For example, there is no text field for a really full report and this is why I created a custom one. But to view this mostly meaningful for me information, I must go to the report editing page - annoying thing.

#10 - 2012-04-18 15:40 - Gabriel Pettier

I did a patch to my redmine instance to allow Project custom fields (string and bool), it was done on an older version of redmine, I put it in the last git, but untested on this version.

<https://github.com/tshirtman/redmine/commit/257b08e1359a19bc70cc555fdc7b8c6b8d842743>

- Assignee set to Jean-Philippe Lang

Could not get Gabriel's patch to work on 2.0.3, but here's one adding custom project fields of type list and bool to the time report view:

```

+++ b/lib/redmine/helpers/time_report.rb
@@ -157,6 +157,13 @@ module Redmine
                                     :label => cf.name}
     end

+     # add project custom fields
+     ProjectCustomField.find(:all).select {|cf| %w(list bool).include? cf.field_format }.each do |cf|
+       @available_criteria["cf_#{cf.id}"] = {:sql => "(SELECT c.value FROM #{CustomValue.table_name} c WHERE
+ c.custom_field_id = #{cf.id} AND c.customized_type = 'Project' AND c.customized_id = #{TimeEntry.table_name}
+ ).project_id ORDER BY c.value)",
+                                     :format => cf.field_format,
+                                     :label => cf.name}
+     end
+
+     @available_criteria
  end
end
```

This patch is actually well in line with issue [#8161](#) adding project custom fields for issue queries. Could this patch go into the upcoming 2.1 release?

Best regards,
Bo

+1 It would be great to have the ability to show custom time entry fields in the Spent Time Details list!

#16 - 2012-10-18 23:30 - Jean-Philippe Lang

- Target version set to 2.3.0

#17 - 2013-01-03 21:16 - Bob Pack

Will this change also include Issue custom fields? This would make a great difference for my company.

If you need a use-case, consider this organization, which seems like it should be somewhat common and very powerful- we have issues/tasks that are organized according to component. The components (projects) are a flat list. We then get paid to make specific updates to different components, depending on the customers' needs/wants. So, a particular customer may want Components A,B, and C to get updated, with changes identified in Tasks X,Y,Z (members of A,B, and C respectively). That is a simple case, because of course there are many components, and many tasks, and many customers, but you should see where I'm going. It's very useful (and important) for me to be able to go to the Spent Time Report and identify what work was done for a particular customer on a particular contract. I can't do that today. ALSO, please note: I don't want my employees to enter the contract/client on their spent time report- I specifically want this data to be entered during the planning phase as a custom field on the issue, so upper management can have visibility to progress through the "All Issues" querying system. I have a different system to track time spent on contracts.

#18 - 2013-01-10 19:10 - Marc Neeley

+1 in what Bob Pack is saying here. I too see requests by external customers and internal managers wanting to see Estimated Time and % Complete shown next to Spent Time in the reports. This essentially becomes the Gantt in report form rather than graphic form. They are already seeing issues in the reports, just not various key fields.

#19 - 2013-01-12 13:41 - Jean-Philippe Lang

Bob Pack wrote:

You will be able to filter the spent time list/report by issue custom fields.

#20 - 2013-01-12 14:10 - Jean-Philippe Lang

Issue custom fields are now available as columns in spent time details ([r11174](#)).

#21 - 2013-01-15 00:11 - Bo Hansen

Looks good in current trunk - much requested feature to get the filters in the report view.
Any chance to see the project custom fields added to the list of columns also?

Thanks in advance,
Bo

#22 - 2013-01-15 10:11 - Daniel Felix

Bo Hansen wrote:

This is also requested in another issue [#1766](#).

#23 - 2013-01-16 17:15 - Bob Pack

Thanks for the work on this feature! It will be a huge help, and you can bet that as soon as 2.3 is released I will be upgrading. I may try out the trunk for the first time based on our need for this. This gives me another dimension to sort the data over, which I sorely have needed.

This essentially becomes the Gantt in report form rather than graphic form. They are already seeing issues in the reports, just not various key fields.

For example, we use TEXT field for additional comments to a reports.

#29 - 2013-06-26 11:30 - delfo esposito

more details about my issue:
Report working:

`/projects/cdgprojects/time_entries/report?utf8=%E2%9C%93&criteria[]=project&period_type=2&from=2013-06-01&to=2013-06-26&columns=month&criteria[]=cf_99`

where cf_99 is type LIST

if i use cf_100 which is TEXT it is just ignored

anything in global settings to set maybe?

#30 - 2014-07-17 19:40 - Joel SCHAAL

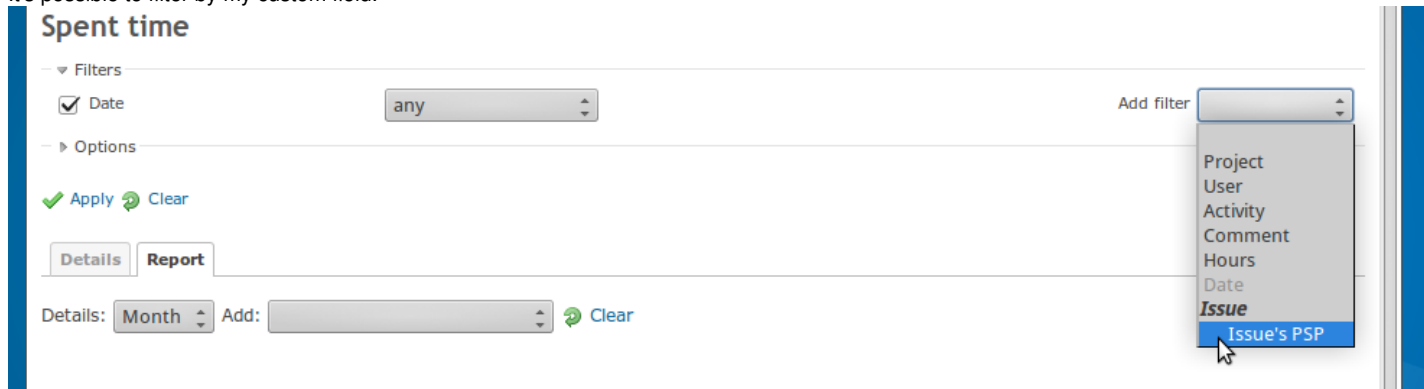

It seems I do not see our custom field (of type Integer) in the details of the time entries (when I access `/projects/foo/issues/42/time_entries`) Did I miss something in my configuration (/ how I use this feature) or has there been a regression on this topic since 2.3.0 ?

#31 - 2015-07-15 18:04 - Felix M

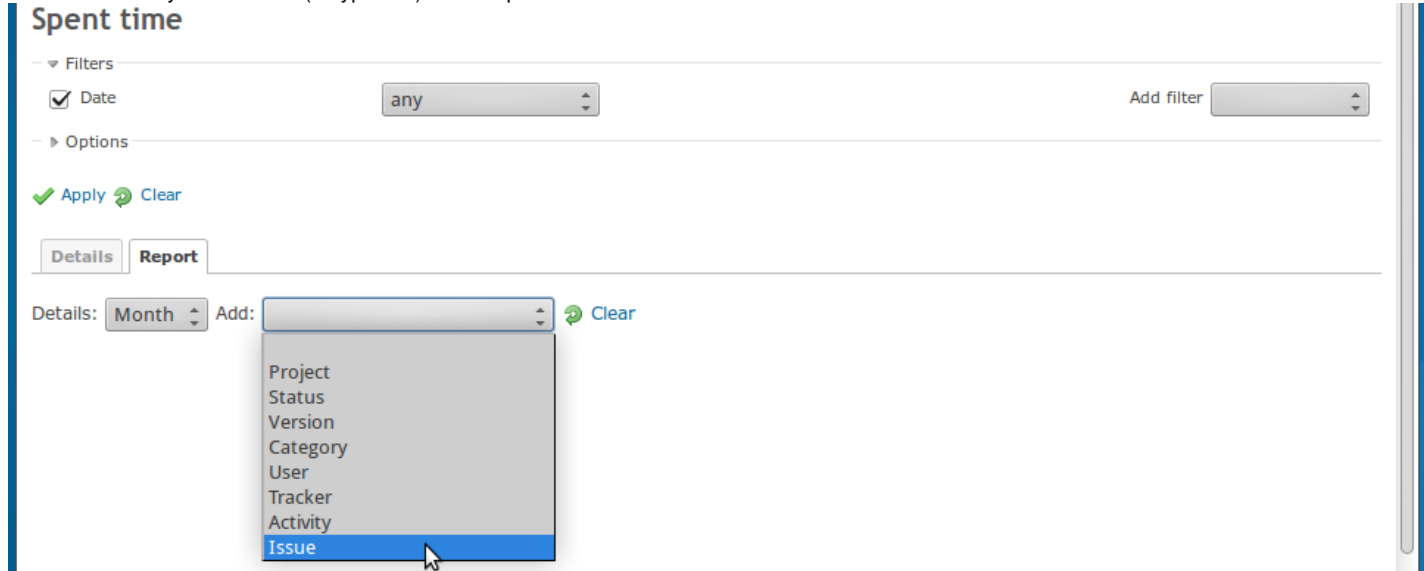

- File a.png added
- File b.png added

I agree with Joel: If this was working in 2.3.0, then there has been a regression.
I'm using 3.0.3.stable, and I'm trying to add an Issue's Custom Field of type text (called PSP) to the time report (`time_entries/report`).

It's possible to filter by my custom field:

But I can't add my custom field (of type text) to the report:

#32 - 2015-07-15 19:39 - Felix M

I get the desired behavior (i.e. add a string custom field to the report) if I make the following changes:

in `lib/redmine/field_format.rb`, in class `StringFormat` add:

```
def group_statement(custom_field)
order_statement(custom_field)
end
```

```
in lib/redmine/helpers/time_report.rb
change custom_fields.select {|cf| %w(list bool string).include?(cf.field_format) && !cf.multiple?}.each do |cf|
to custom_fields.select {|cf| %w(list bool).include?(cf.field_format) && !cf.multiple?}.each do |cf|
```

But I don't understand why only list and bool had group_statement in field_format.rb and were treated differently in time_report.rb. Does my change have any unforeseen consequences?

I get the desired behavior (i.e. add a string custom field to the report) ...

I don't know it is related or not, I created issue [#19121](#).

#34 - 2015-09-24 00:55 - James Vreeken

I am also having this problem... we have a custom field called "Job Number" we would like to be able to create a report thru the tool that exports the week with time spent along with the job number... Its not working...

I tried what Felix M said to do by editing lib/redmine/field_format.rb and lib/redmine/helpers/time_report.rb but I still can't get custom fields to show up in the list on the report tab...
