| Resolution: | | | |
| Description | | | |
| <p>If the body is dark then the content parts show up only until 600px height. This height is not moving further down if content gets extended in your personalized page.</p> <p>i.e. if you use calendar width 100% and below 2 50% boxes with content i.e. latest news, open issues ... then those part won't have a white background</p> <p>Solution would be to have another div id=wrap after body</p> <p>The you could assign</p> <pre>body {background: black; margin:auto; width:974px} #wrap {background: white}</pre> <p>at the moment this isn't possible without editing the templates itself but after an update those templates would get overwritten as only the css is stored in themes.</p> | | | |

History

#1 - 2008-01-06 12:29 - Jean-Philippe Lang

Div added in [r1044](#). Its id is: wrapper.
