<b>Target version:</b>	2.6.0		
<b>Description</b>			
<p>To improve user account security, we believe it is a good practice to expire all other active user sessions (on other computers or browsers) once a user changes their password.</p> <p>Please find attached a patch that implements this feature against current trunk; tests included.</p>

##### Revision 13412 - 2014-09-16 23:38 - Jean-Baptiste Barth

Expire other sessions on password change (#17796).

Contributed by Jan Schulz-Hofen.

#### History

##### #1 - 2014-09-08 22:18 - Jean-Baptiste Barth

- Assignee set to Jean-Baptiste Barth

Good practice I think. Same as #17717, I'd like to have some guidance about how we deal with that kind of patch. I didn't test this one but I'll review it and test it when I know what to do.

##### #2 - 2014-09-13 11:55 - Jean-Philippe Lang

We can commit this patch now, but I'd like to change the new column to `passwd_changed_on` instead of `password_changed_at`.

##### #3 - 2014-09-13 22:24 - Etienne Massip

- Project changed from Security to Redmine

- Category set to Security

- Target version set to 2.6.0

##### #4 - 2014-09-16 23:39 - Jean-Baptiste Barth

- Status changed from Needs feedback to Closed

Added in r13412 with the column name requested by Jean-Philippe, and a minor typo fixed in the test. Thanks!
