Target version:	4.1.0		
Resolution:	Fixed		
Description I have a request to add an option to send email notification of Issues Target Version changes. It may be possible to provide an option to enable this in the Administration Panel under Email Notifications. I could not find such option in the Administration Panel. Thanking you in advance. regards Rakesh

- Status changed from New to Needs feedback

Just so you know, enabling "Issue updated" will email you on every issue update, including modification of "Target version". If I misunderstood your request please explain what you want with more details.

#3 - 2014-09-11 10:47 - Rakesh Gupta

I would like to get mail notification ONLY if issue is updated for "Target Version Updation". Example; A issue is updated 10 times out of which 2 times it was updated for changing the Target Version from "M1 to M2" and from "M2 to M3" so by default i will get email notification 10 times but i would like to have configuration **only** to receive 2 email Notifications related to following:

- 1) Target version changed from M1 to M2
- 2) Target version changed from M2 to M3

Objective is to watch **only** scope change for Target Milestones.

Note: M1,M2 and M3 are Target Version in this example.

Ok I understand the request. It's not implemented for now but it may be something great in the future. If you need this quickly, maybe you can develop a plugin to do that, it's not really complicated to filter out notifications based on pre-defined criteria as long as the criteria are simple and don't change.

- File notified_events_target_version.png added

- File 17840_notified_events_target_version.patch added

I added "Target version updated" checkbox to "Administration" > "Settings" > "Email notifications" tab.

notified_events_target_version.png

I attached a patch.

#8 - 2019-10-04 03:18 - Go MAEDA

- File notified_events_setting-20191004@2x.png added

- Target version set to Candidate for next major release

This is a truly useful feature. The change of the target version is one of the important information to be notified.

The following screenshot is the notified_events configuration that I am actually using in my company. I have disabled "Issue updated" and enabled "Note added" and "Assignee updated" because I don't want to receive trivial notifications such as "Relation added" and "Subject updated".

Select actions for which email notifications should be sent.

- ☒ Issue added
- ☐ Issue updated
- ☒ Note added
- ☐ Status updated
- ☒ Assignee updated
- ☐ Priority updated
- ☒ News added

The above config works fine for me except for one thing. The only problem for me is that the update of the target version is not notified. Currently, there is no means to notify it if "Issue updated" is disabled.

If the proposed feature is implemented, I can configure to notify the update of the target version with disabling "Issue updated".

#9 - 2019-10-04 05:42 - Go MAEDA

- Target version changed from Candidate for next major release to 4.2.0

The patch works fine. Setting the target version to 4.2.0.

#10 - 2019-10-05 11:48 - Go MAEDA

- Subject changed from Add email notification on "Target Version Changes" for issues to Option to send email notification on "Target version updated"

- Status changed from New to Closed

- Assignee set to Go MAEDA

- Target version changed from 4.2.0 to 4.1.0

- Resolution set to Fixed

Committed the patch. Thank you for your contribution.
