<b>Target version:</b>	
<b>Description</b>	
<p>I just needed this modification due to projects structure in Redmine and thought it might be usefull for some other users.</p> <p>Note that this patch raises the maximum-length of a issue-category name from 30 characters to 40 characters. If the limit of 40 characters isn't sufficient modify the patch by replacing the instances of 40 to the desired maximum-length.</p> <p><b>Warning:</b> this patch can malform/break different views depending on your setup. I guess that is the main reason why issue-category names are limited to 30 characters by default.</p>
