

Redmine - Defect #18060

Selected projects in email notifications on "my account" are lost when the page is redisplayed after a validation error.

2014-10-10 15:42 - Felix Schäfer

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Email notifications	Estimated time:	0.00 hour
Target version:	2.6.1	Affected version:	2.5.2
Resolution:	Fixed		
Description			
On "my account" with "for any event on the selected projects only" selected in the email notifications area and some projects selected for that, the selected projects (newly selected and already saved) are lost if the page gets redisplayed after for example a validation error (no first name for example).

Revision 13638 - 2014-11-22 11:56 - Jean-Philippe Lang

Selected projects in email notifications on "my account" are lost when the page is redisplayed after a validation error (#18060).

Patch by Felix Schäfer.

Revision 13642 - 2014-11-23 09:44 - Jean-Philippe Lang

Merged r13638 (#18060).

History

#1 - 2014-10-10 16:04 - Felix Schäfer

- File 18060-coerce_ids_to_integers added

The problem is that `User#notified_projects_ids=` [source:/trunk/app/models/user.rb@13435#L355](#) may receive an array of strings, for example from an update through a web form, which is stored as is. [source:/trunk/app/views/users/_mail_notifications.html.erb@13435#L16](#) on the other hand expects an array of integers to populate the form.

The attached patch makes sure anything passed to `User#notified_projects_ids=` is stored as an array of integers in the instance variable.

#2 - 2014-11-09 04:27 - Toshi MARUYAMA

- Target version set to 2.6.1

#3 - 2014-11-22 11:57 - Jean-Philippe Lang

Patch committed in [r13638](#).

#4 - 2014-11-23 09:45 - Jean-Philippe Lang

- Status changed from New to Closed

- Assignee set to Jean-Philippe Lang

- Resolution set to Fixed
