

## Redmine - Defect #18173

### Mixed rails versions in trunk?

2014-10-23 18:42 - Ivan Cenov

<b>Status:</b>	Closed	<b>Start date:</b>	
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Rails support	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	2.6.0
<b>Resolution:</b>	Invalid		

**Description**

After updating trunk to [r13495](#) here is what I saw

```
Microsoft Windows [Version 6.1.7601]
Copyright (c) 2009 Microsoft Corporation. All rights reserved.

D:\apps\redmine_svn>thin start -e production -p 3000
Using rack adapter
←[31mCould not find gem 'tzinfo-data (>= 0) x86-mingw32' in the gems available on this machine.←[0
m
←[33mRun `bundle install` to install missing gems.←[0m

D:\apps\redmine_svn>bundle install --without test development
Fetching gem metadata from https://rubygems.org/.....
Fetching gem metadata from https://rubygems.org/.....
Resolving dependencies...
You have requested:
  rails = 4.1.6

The bundle currently has rails locked at 3.2.19.
Try running `bundle update rails`

D:\apps\redmine_svn>
```

I saw similar mixing of rails versions when upgraded our Redmine production server to 2.6.0. Is this some mismatch in trunk?

### History

#### #1 - 2014-10-23 20:28 - Toshi MARUYAMA

trunk uses Rails 4.1 from [r13482](#).

#### #2 - 2014-10-23 23:55 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Invalid

No mismatch, you need to remove your Gemfile.lock or run `bundle update` instead.
