Description

I wanted to change elements of default my_page site.

I have done this by editing:

```
app/controllers/my_controller.rb
```

and changing:

```
DEFAULT_LAYOUT
```

Constant

I think that it will be better to move it somewhere to configuration file.

It will be preserved eg. after update process

What do you think?

+1

Default blocks definition has been moved to lib/redmine/my_page.rb in [r15930](#).
