Target version:	2.6.1			
Resolution:	Fixed		**Affected version:**	2.6.0

Description

As mentioned on [PRE tags wrap with latest Google Chrome, Redmine 2.6.0 (W...](#) it appears the patch intended to fix [#12580](#) is wrapping the contents of pre tags when used in the description for issues. Posting the same content within pre tags as a follow-up note on the same issue preserves white-space as intended.
