

Redmine - Defect #18654

Custom field is rendered, even if its value is empty (for multiple)

2014-12-16 13:37 - Andriy Lesyuk

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Custom fields	Estimated time:	0.00 hour
Target version:	3.0.0	Affected version:	2.6.0
Resolution:	Fixed		
Description			
Redmine checks, if the value is available for the custom field, as follows:			
<pre>if custom_value.value.present?</pre>			
But for multiple custom fields (e.g., lists, that allow selecting multiple values), the original nil value is replaced with [nil] (<i>not sure where exactly</i>). So, [nil].empty? returns false and the custom field gets rendered.			
This issue affects 3.0.x and 1.4.x versions of Redmine.			
P.S. Can be solved by montkey-patching `CustomFieldValue` as follows:			
<pre>alias_method_chain :value, :extended</pre>			
...			
<pre>def value_with_extended value = value_without_extended if custom_field.multiple? && value.present? && value.size == 1 && value.first.nil? nil else value end end</pre>
