Resolution:	Fixed		

Description

This is the brother ticket of [#18894](#). (see [#18894-5](#)).

In the query with "Group results by" a boolean filed, both "No" and "(blank, or to say, not specified)" are grouped under same name (label) of "none" collapse/expand indicator lines.

This happens if the boolean field is not defined as "required".

Boolean field which is not defined as "required" contains 3 values, "Yes", "No" and "(blank, or to say, not specified)", so it is better to be grouped in different label names.

Could it be changed the label of "none" for "(blank, or to say, not specified)" value to the other one ?

The candidate strings are "null", "No Value", or"(blank)".

- Notes on translation

I am afraid translation texts may be affected when changing the label text strings. For example, "none" is translated to "[]" in Japanese. If the string is "null", it may be translated to "[]".

- Reported version

Redmine 2.5.0.stable. Details are as follows.

1. Test redmine (Windows7)

```
Environment:
  Redmine version  2.5.0.stable
  Ruby version     1.9.3-p231 (2012-05-25) [i386-mingw32]
  Rails version    3.2.17
  Environment      production
  Database adapter MySQL2
```

2. Production redmine (Linux)

```
Environment:
  Redmine version  2.5.0.stable
  Ruby version     1.9.3-p484 (2013-11-22) [x86_64-linux]
  Rails version    3.2.17
  Environment      production
  Database adapter PostgreSQL
```

Associated revisions

Revision 13979 - 2015-02-08 10:37 - Jean-Philippe Lang

Adds a specific string for blank values (#18918).

Revision 13980 - 2015-02-08 10:39 - Jean-Philippe Lang

Fixed assertion (#18918).

"(blank)" is appropriate, I think.

Thank you very much to you all of redmine.org.
