<b>Resolution:</b>			
<b>Description</b>			
Dear all,			
I am using			
Environment:			
Redmine version	2.6.0.stable		
Ruby version	2.0.0-p594 (2014-10-27) [i386-mingw32]		
Rails version	3.2.19		
Environment	production		
Database adapter	Mysql2		
SCM:			
Subversion	1.8.8		
Git	1.9.0		
Filesystem			
Redmine plugins:			
clipboard_image_paste	1.9		
redmine_ckeditor	1.0.16		
redmine_landing_page	0.1.0		
redmine_watcher_groups	0.0.2		
The pdf export under Issues (without any changes) results in a "502 Proxy Error" and the I have to restart all services so Redmine is working again.			
!pdf export error.jpg!			
If I first use some filter possibilities the export works fine.			
Any suggestions how to fix this problem?			
Do you need more information to help?
