

Redmine - Defect #19234

Problem with prefilled issue forms and custom fields

2015-03-02 12:12 - Marco Scholl

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Custom fields	Estimated time:	0.00 hour
Target version:		Affected version:	3.0.0
Resolution:	Wont fix		
Description			
we have a big problem. we prefill the issue form with this url			
<a href="https://host/projects/name/issues/new?issue[custom_field_values][1]=customfield&amp;issue[assigned_to_id]=1">https://host/projects/name/issues/new?issue[custom_field_values][1]=customfield&amp;issue[assigned_to_id]=1</a>			
since redmine 3 this will no longer work.			

History

#1 - 2015-03-02 16:49 - Marco Scholl

In Issue#safe\_attributes the editable\_custom\_field\_values(user) method return an empty list. so the parameter will dropped.

#2 - 2015-03-02 16:54 - Marco Scholl

so i have found the problem. the tracker isn't filled with default tracker. so the editable\_custom\_field couldn't find any custom fields. i think the issue model should prefilled with default.

as workaround i must set the tracker manual -> &issue[tracker\_id]=ID.

#3 - 2015-03-07 08:39 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Wont fix

Yes, custom fields depends on the issue tracker. You now need to provide a tracker\_id if you want to set default values for the issue custom fields.
