Redmine - Defect #19323

Incorrect links generated in emails if host setup uses other port (":" symbol)

2015-03-10 13:02 - Eugene B

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:	Jean-Philippe Lang		**% Done:**	0%
Category:	Email notifications		**Estimated time:**	0.00 hour
Target version:	3.0.1			
Resolution:	Fixed		**Affected version:**	3.0.0

Description

We were using 2.4.1 Bitnami installation for about a year with no problems. After 3.0.0 release we have switched to this new version to be sure we are using current Redmine branch, and our installation is not so outdated. We are using Bitnami 3.0.0 installer for windows platforms.

We have found a problem, that email links to task, that redmine provides within email body are broken. Our Redmine installation is availble on the address: http://10.0.0.1:81/redmine/ and according to this, at redmine settings, host is set as "10.0.0.1:81/redmine/"

But at the e-mail, link is the following: "http://10.0.0.1/issues/2460" while it should be "http://10.0.0.1:81/redmine/issues/2460" we have double checked, and we have found, that after ":" symbol at the host line, the rest is cut off and not included at the hyperlink.

When host setting was "10.0.0.1/redmine" the hyptrlink was "http://10.0.0.1/redmine/issues/2460" the only missing thing was the port. after we set host again with port, we got the link "http://10.0.0.1/issues/2460" again. So it seems redmine ignores the rest of the host address string after ":" symbol.

Merged r14081 (#19323).

History

#1 - 2015-03-10 20:31 - Eugene B

Confirmed on 2 different PC (Server 2008R2 and Win 8.1)

Windows 8.1 details:

Host PC Win 8.1

c:\Redmine\3.0.0\apps\redmine\htdocs>ruby script/about
script/about no longer exists, please use bin/about instead.

c:\Redmine\3.0.0\apps\redmine\htdocs>ruby bin/about
DL is deprecated, please use Fiddle

Environment:
Redmine version   3.0.0.stable
Ruby version   2.0.0-p594 (2014-10-27) [i386-mingw32]
Rails version   4.2.0
Environment   production
Database adapter   Mysql2
SCM:
Subversion   1.8.10
Git   1.9.5
Filesystem
Redmine plugins:
no plugin installed

c:\Redmine\3.0.0\apps\redmine\htdocs>

The bug is very easy to observe, just >>>get<<< latest 3-0-0 installation from bitnami, install it. At Administration > Settings > General

setup Host name and path as: "10.0.0.1:81/redmine"

after that setup any mail (gmail or what else is faster) and update any tasks
with email notification. You will see that hyperlink to redmine task is broken at notify email.
