

Redmine - Defect #19398

Failed to get attachment with Chinese filename.

2015-03-16 11:00 - Alan Liu

Status: Closed	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version:	Affected version: 3.0.0
Resolution: Duplicate	

Description

- No problem to get attachment with ASCII filename.
- Failed to get attachment with Chinese filename. (Internal server error)

Environment:

Redmine version	3.0.0.stable
Ruby version	1.9.3-p545 (2014-02-24) [i386-mingw32]
Rails version	4.2.0
Environment	production
Database adapter	Mysql2

SCM:

Subversion	1.7.5
Git	1.9.5

Filesystem

Redmine plugins:

redmine_issue_templates	0.1.0

#3 - 2015-03-17 02:13 - Alan Liu

- Status changed from Closed to Reopened

More background information:

- OS: Windows Server 2008 R2 Standard SP1 (Traditional Chinese)
- We do not use bitnami package.
- The problem is caused after upgrading redmine from 2.6.1 to 3.0.0.

Thanks.

I cannot reproduce on Windows 8.1 Pro with webrick (#19374#note-3).

We cannot support individual web server and environment.

#5 - 2015-03-17 10:21 - Alan Liu

It caused by Rails 4.2 (<https://github.com/rails/rails/issues/19187> has a workaround, but I don't understand yet).

Indeed, webrick has no problem.

But thin & puma do.

Why? webrick doesn't work with Rails 4.2?

(Sorry, I'm not a ruby programmer)

It is obvious thin problem.

You should report to thin, not to Rails.

Redmine is Rails app and does not depend on any web server.

We cannot do anything.

#8 - 2015-03-18 03:04 - Alan Liu

The workaround (<https://github.com/rails/rails/issues/19187>): add some codes in

C:\Ruby193\lib\ruby\gems\1.9.1\gems\actionpack-4.2.0\lib\action_dispatch\middleware\static.rb

```
rescue EncodingError
  false
```

It will be (from line 31, **EncodingError** fixes my case)

```
if match = paths.detect { |p|
```

```
path = File.join(@root, p)
begin
  File.file?(path) && File.readable?(path)
rescue SystemCallError
  false
rescue EncodingError
  false
end
}
```

#9 - 2015-03-26 14:15 - Toshi MARUYAMA

I have created issue.

- Status changed from Closed to Reopened

The problem comes back after upgrading to 3.0.2 & fixed by adding the same code in
C:\Ruby193\lib\ruby\gems\1.9.1\gems\actionpack-4.2.1\lib\action_dispatch\middleware\static.rb

Environment:

```
Redmine version      3.0.2.stable
Ruby version         1.9.3-p545 (2014-02-24) [i386-mingw32]
Rails version        4.2.1
Environment          production
Database adapter     Mysql2
```

SCM:

```
Subversion           1.7.5
Git                  1.9.5
```

Filesystem

Redmine plugins:

```
redmine_issue_templates 0.1.0
```

Rails 4.2.2 will fix.

<https://github.com/rails/rails/commit/4df216cb12e35c09ae5ec271755e581d692d0326#diff-6897a0b59abaaa3bbc85da93757c39d9L32>

#12 - 2015-04-28 06:57 - Toshi MARUYAMA

You can use Rails 4-2-stable branch to change Gemfile.

```
-gem "rails", "4.2.1"
+gem "rails", :github => 'rails/rails', :branch => '4-2-stable'
```
