I have created issue.

- Subject changed from *Mingw Ruby 2.2: NameError: uninitialized constant ActionView::Helpers::ActiveModelHelper* to *MinGW Ruby 2.2: NameError: uninitialized constant ActionView::Helpers::ActiveModelHelper*

It seems because nokogiri does not support MinGW Ruby 2.2.

<https://github.com/sparklemotion/nokogiri/issues/1256>

Depending:

```
actionpack (4.2.1) -> rails-html-sanitizer (~> 1.0, >= 1.0.1) -> loofah (~> 2.0) -> nokogiri (>= 1.5.9)
```

- Status changed from *Confirmed* to *Closed*

- Resolution set to *Invalid*

We cannot do anything.

I have updated [RedmineInstall](#) to ver. 235.
