

Redmine - Feature #19720

Create a issue on the mail problem

2015-04-28 05:33 - bin wang

Status: Closed	Start date:
Priority: High	Due date:
Assignee:	% Done: 0%
Category: Email receiving	Estimated time: 0.00 hour
Target version:	
Resolution: Invalid	

Description

Requirements: when the message create issue, the message subject is or not repeated for issue list
Now the development progress:
1.The script successfully with imap
[] rake -f /opt/redmine/web/Rakefile redmine:email:receive_imap RAILS_ENV="production" host=imap.foo.bar username=[xxx@foo.bar](#) password=xxxxxx allow_override=tracker[]
2.It has been found '/opt/redmine/lib/redmine/imap.rb' file (Only read about)

The question now is:
1.when the message create issue, where is call the method code for create issue
2.I want modify about mothod code

I'm English is not good ,I'm sorry

Thank you
