

## Redmine - Defect #2

### Listing 5 projects on Welcome page

<b>Description</b>	
Jean-Philippe,	
I think there is an issue on the welcome.rhtml page when the code lists all the projects:	
<pre>&lt;div class="splitcontentright"&gt; &lt;div class="box"&gt; &lt;h3&gt;&lt;%=l(:label_project_latest)%&gt;&lt;/h3&gt; &lt;ul&gt; &lt;% for project in Projects Projects &gt; &lt;li&gt; &lt;= link_to project.name, :controller =&gt; 'projects', :action =&gt; 'show', :id =&gt; project &gt; (&lt;= format_time(project.created_on) &gt;)&lt;br /&gt; &lt;=h project.description &gt; &lt;/li&gt; &lt; end %&gt; &lt;/ul&gt; &lt;/div&gt; &lt;/div&gt;</pre>	
Or, perhaps more importantly in the welcome_controller.rb:	
<pre>def index   @news = News.latest   @projects = Project.latest end</pre>	
Reason: If a user clicks on a non-public project where he is not a member, they will receive a blank page (error).	
Perhaps it will be better not to see private projects where the user is not a member?	
As a potential solution, let's update the Project.latest method to return 5 projects where logged_in_user is a member or the project is public?	
What do you think?	
Todd	

#### Associated revisions

##### Revision 473 - 2007-04-24 15:57 - Jean-Philippe Lang

Commit messages are now scanned for referenced or fixed issue IDs.  
Keywords and the status to apply to fixed issues can be defined in Admin -> Settings.

Default keywords:

- for referencing issues: refs, references, IssueID

- for fixing issues: fixes, closes

There's no default status defined for fixed issue. You'll have to specify it if you want to enable auto closure of issues.

Example of a working commit message: "This commit references #1, #2 and fixes #3"

#### History

**#1 - 2006-12-31 18:29 - Todd McGrath**

Jean-Philippe,

I'll attach two patch files that solved it (project.rb-PATCH.txt and welcome\_controller.rb-PATCH.txt). What do you think? (I'm coming from Java and trying to learn more Ruby/Rails. I'm not very confident in Ruby yet and appreciate any feedback)

Todd

**#2 - 2007-01-01 05:20 - Jean-Philippe Lang**

Happy new year Todd !  
I've corrected this bug, with a slight different solution (your code was good but i prefer not to add a join).  
I've modified "Latest news" too so that they are displayed according to user's membership.  
Just a thing about your code: don't forget that logged\_in\_user can be nil (if nobody's logged).

Best regards,

Jean-Philippe
