Description Currently, issues visibility options in "Roles & Permissions" determine if a user is allowed to see all issues, all non private issues, or issues created by, or assigned to the user. Feature request: <ul style="list-style-type: none">• Add an option to allow issues where the user is a watcher. This could be bundled with the last option, where the user either created the issue, is assigned to the issue or is a watcher on the issue.
