Redmine - Defect #2011

Building the RDoc-documentation halts on init.rb.

2008-10-09 02:27 - Mischa The Evil

Status:	Closed		**Start date:**	2008-10-09
Priority:	Low		**Due date:**

Category:			**Estimated time:**	0.00 hour
Target version:	0.8			
Resolution:	Fixed		**Affected version:**	

Description

As discussed on IRC;

When building the RDoc-documentation using (for example) "rake doc:app", rake freezes completely on an instance of the file init.rb.

Cause of this:

Associated revisions

Revision 1949 - 2008-10-25 06:37 - Eric Davis

Renamed the .rb files in the plugin_generator to end in .erb. The .rb was
causing rdoc to try to document them and fail.

- Updated the generator's manifest to use the new files
- Renamed template README to README.rdoc

  #2011

History

#1 - 2008-10-25 06:31 - Eric Davis

- Status changed from New to Closed

- Target version set to 0.8

- % Done changed from 0 to 100

- Resolution set to Fixed

This was because the plugin generator's template file ended in .rb and init.rb caused rdoc to error. I renamed the files to end in .rb.erb in r1949 so the
rdocs will now build again. Thank you for the bug report.
