Target version:				
Resolution:			Affected version:	3.0.3

Description

Hi all,

Today I upgraded from Redmine 2.6 to 3.0 and also all my plugins.
Everything seems to work except the date fields.

I get by start date and all other my custom date fields "is not a valid date".
Redmine is unusable now.

I tried to change languages in settings and browser. Nothing helps...

Environment:
Redmine version   3.0.3.stable
Ruby version   2.0.0-p481 (2014-05-08) [x86_64-linux]
Rails version   4.2.3
Environment   production
Database adapter   PostgreSQL
SCM:
Mercurial   3.1.2
Git   2.1.4
Filesystem
Redmine plugins:
recurring_tasks   2.0.0-pre
redmine_checklists   3.0.4
redmine_mylyn_connector   2.8.2.stable

Postgresql Server 9.3

Try without plugins.

#3 - 2015-07-07 10:55 - Vlad Vor

Ok, I have find out that the valid date for redmine is only the format YYYY-mm-dd (example 2015-07-05)
But JavaScript Calendar localize the Date like 07/14/2015.
An thin is not valid date for redmine.
I have to type date manualy in the format YYYY-mm-dd

So that is definitivly a bug.

PS: I did

```
ALTER DATABASE "redmine_db" SET datestyle="ISO,MDY";
```

#4 - 2015-08-17 15:07 - Marc D.

We got the same issue, the datepicker enters the dateformat of your chosen language.
For DE: dd.mm.yy

Workaround:

Edit the jquery.ui.datepicker-de.js of your language. (in redmine/public/javascripts/i18n)
Change dateFormat to " dateFormat: 'yy-mm-dd', "

#5 - 2015-12-07 13:12 - Ronny K

Same issue, datepicker displayed in bottom of page.

Deactivate plugin **redmine_tweaks** for my Installation and all is fine.

#6 - 2015-12-07 16:14 - Alexander Meindl

This problem has been fixed with the latest redmine_tweaks update, see https://github.com/alexandermeindl/redmine_tweaks/issues/23. I suppose,
that the problem from Vlad is another problem, which is not depending on redmine_tweaks (because redmine_tweaks didn't include the calendar
macro 4 month ago).
