Redmine - Feature #20364

Allow batch-editing of project settings for multiple projects

2015-07-17 10:21 - Alexey Karakulov

Category:	Project settings	**Estimated time:**	0.00 hour
Target version:			
Resolution:			

Description
I found out I can't enable/disable modules for all existing projects at once, only by visiting each project settings one by one. I think it's very important lacking functionality.
