Category:	REST API	Estimated time:	0.00 hour	
Target version:				
Resolution:		Affected version:	2.6.0	
Description				
This is a strange	behaviour of the API. I'm using r	ack-cors to enable API consuming by c	other apps (Ember.js).	
When using varie	ous endpoints (/issues.json, time	_entries.json, projects.json) everything	is ok.	
'Access-Control- The call is: /time_entrie or	call, CORS headers aren't adde Allow-Origin' header is present o s.json?user_id= <id> s.json?user_id=me</id>		cks the request with the "famous" error: No	
The only added	neader is:			
X-Rack-CORS: preflight-hit; no-origin				
filtered). So the p	problem seems to be related to the	e filtering of the time entries by user. a different response which avoid the	ne), everything works well (the response isn't rack-cors action?	
The correct headers, added by rack-cors, should be:				
Access-Control-Allow-Origin: http://localhost:4200 Access-Control-Allow-Methods: GET, POST, DELETE, PUT, OPTIONS, HEAD Access-Control-Max-Age: 0 Access-Control-Allow-Credentials: true X-Rack-CORS: hit
