History

#1 - 2015-08-12 13:31 - Arnis Juraga

Sorry, accidently saved unfinished issue description:

3. Now, Open the Wiki link again:

projects/wiki-page-move-test/wiki

4. choose "Rename", and select different project, e.g. "New project".
5. Leave selected "Redirect existing links" and click "Rename"

Now in old project - default link "WIKI" from project page main menu, will be redirected to the new project wiki content.
Instead of

projects/wiki-page-move-test/wiki

the link from project main menu becomes

projects/new-project/wiki

You now cannot access project "Wiki page move test" project WIKI from project main menu, as it is "rewritten".
