Resolution:	Invalid		

Description

1. Go to settings
2. choose "Markdown (experimental)" as Text formatting.
3. Go to any WIKI page, crate new page.

The new page will have heading

```
# Heading test
```

Instead of default Markdown heading formatting:

```
Heading test
===
```

History

#1 - 2015-08-13 03:39 - Go MAEDA

- Subject changed from *Incorrect new WIKI page heading, when using "Markdown" text formatting* to *Markdown formatter does not support Setext-style headers*

According to [Markdown Syntax Documentation](#), Markdown supports two styles of headers. Both of the following are correct syntax.

Setext-style:

```
This is an H1
=====
```

```
This is an H2
-----
```

Atx-style:

This is an H1

This is an H2

#2 - 2015-08-13 03:40 - Go MAEDA

- *Subject changed from Markdown formatter does not support Setext-style headers to Incorrect new WIKI page heading, when using "Markdown" text formatting*

#3 - 2015-08-18 08:51 - Jean-Philippe Lang

- *Status changed from New to Needs feedback*

- *Assignee set to Arnis Juraga*

Please explain how your proposed fix is better than the current default.

#4 - 2016-05-08 04:46 - Go MAEDA

- *Status changed from Needs feedback to Closed*

- *Resolution set to Invalid*

As I described in [#20526#note-1](#), it is not incorrect.
