

Redmine - Patch #2059

broken subject when submitting issue via email written in japanese

2008-10-21 14:00 - Go MAEDA

Status:	Closed	Start date:	2008-10-21
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Email receiving	Estimated time:	0.00 hour
Target version:			
Description			
TMail class in ActionMailer::Base decodes subject to ISO-2022-JP when the subject is written in Japanese. But it should be utf8 when set to issue.subject. As a result, we get broken subject like the attached picture.

Revision 1990 - 2008-11-07 18:27 - Jean-Philippe Lang

Fixed: broken subject when submitting issue via email written in japanese (Patch #2059 by Go MAEDA).

History

#1 - 2008-11-07 18:27 - Jean-Philippe Lang

- Status changed from New to Closed

Patch applied in [r1990](#). Thanks.

#2 - 2009-09-24 07:24 - Nobuhiro IMAI

- File mail_hander_broken_attachment_filename.diff added

- Status changed from Closed to Reopened

The same problem is on the filename of attachment files.
Attached patch fixes this in a similar way to mail_hander_broken_subject.diff.

However, I wonder where the String#toutf8 method came from.
Only kconv.rb (bundled in Ruby 1.8 series) defines String#toutf8,
and Redmine does not require this library, as far as I know.

Just in case, toutf8 from kconv uses nkf internally,
NKF.nkf decodes MIME encoded string automatically.

```
>> NKF.nkf("-w", "=?iso-2022-jp?B?GyRCJCICJCQmJCgkKhsoQg==?=")
=> "   "
>> "=?iso-2022-jp?B?GyRCJCICJCQmJCgkKhsoQg==?=".toutf8
=> "   "
>> NKF.nkf("-w", "=?utf-8?Q?E3=81=82=E3=81=84=E3=81=86=E3=81=88=E3=81=8A?=")
=> "   "
>> "=?utf-8?Q?E3=81=82=E3=81=84=E3=81=86=E3=81=88=E3=81=8A?=".toutf8
=> "   "
```

#3 - 2009-10-07 18:00 - Ignacio Carrera

, please read [#3717](#) (my comment specifically).

This change broke other non-JP and non-English encodings, plus I believe that TMail was handling your subject correctly (the problem may lie elsewhere).

Jean Philippe seems to have fixed it in [sandbox](#) some months ago...

#5 - 2011-11-28 05:07 - Mischa The Evil
- Category set to Email receiving

#6 - 2015-04-29 12:08 - Toshi MARUYAMA
- Related to deleted (Defect #4608: Mail attachment name encoding is incorrectly handled)

#7 - 2015-04-29 12:09 - Toshi MARUYAMA
Original issue is fixed.
[#2059#note-2](#) is duplicate of [#4608](#).

#8 - 2015-04-29 12:09 - Toshi MARUYAMA
- Status changed from Reopened to Closed
