

Redmine - Patch #20632

Tab left/right buttons for project menu

2015-08-28 17:26 - Felix Gliesche

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	UI	Estimated time:	0.00 hour
Target version:	3.3.0		
Description			
On small screens with many tabs in the project navigation the tabs of the far right are not visible. It would be nice if the tabs can be scrolled left / right like in the second level navigation (e.g. project settings).			
This patch introduces this feature. It uses the same javascript as the second level navigation.			
In order for this to work, you need the the patch attached to #20271

Revision 15067 - 2016-01-16 10:14 - Jean-Philippe Lang

Tab left/right buttons for project menu (#20632).

Patch by Felix Gliesche.

Revision 15249 - 2016-03-15 23:07 - Jean-Philippe Lang

Tab-buttons: add some user-feedback (#20632).

- Hover color
- Enable/disable buttons (visually at least) when no more change is possible
- Width calculation with jQuery only, no longer hard-coded
- Remove ugly outline in Chrome (at least on Mac)

Patch by Daniel Ritz.

For this patch to work, we need inline-block elements instead of left floating elements. I am uploading a little update to the initial patch, that fixes the problem of space between inline-block elements (see problem and solutions to it here: <https://css-tricks.com/fighting-the-space-between-inline-block-elements/>) by removing new lines between the project menu's list elements.

- File deleted (0001-Apply-existing-tab-functionality-to-main-menu.patch)

#5 - 2015-09-01 19:31 - Jan from Planio www.plan.io

Just removed the old patch version

#6 - 2015-12-24 14:28 - Go MAEDA

- Target version set to 3.3.0

The patch can be applied cleanly to the current trunk ([r14989](#)) and works fine.
Maybe overflowed main menu have annoyed many users. Let's include this feature in Redmine 3.3.0.

- File 0002-Tab-buttons-add-some-user-feedback.patch added

- File tabbuttons-left-not-possible.png added

I really like that one! One thing though: how about some user feedback by enabling/disabling the buttons? I hacked together something:

- Hover color
- Enable/disable buttons (visually at least) when no more change is possible
- Width calculation with jQuery only, no longer hard-coded
- Remove ugly blue outline on buttons in Chrome (at least on Mac)

It's only lightly tested. Please see screenshot (and ignore the collapse-sidebar button, that's from [#21808](#).too lazy to un-apply :)

Tabs buttons are now visible on the home page after logging in, when using Redmine 3.3.0 released yesterday. This is a bit confusing, as there are no tabs in the home page.

Since 3.3.0 have been released, please create a new issue to report a defect.
