

Redmine - Patch #20732

MailHandler: Select project by subaddress (redmine+project@example.com)

2015-09-13 08:31 - Jens Krämer

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Email receiving	Estimated time:	0.00 hour
Target version:	3.2.0		
Description			
This patch adds project selection by subaddress to the MailHandler.			
Basically the same feature that's shown at [[MailhandlerSubAddress]], but usable for all ways to receive mail, including the web service.

MailHandler: Select project by subaddress (redmine+project@example.com) (#20732).

Patch by Jens Krämer.

Revision 14690 - 2015-10-19 18:56 - Jean-Philippe Lang

Makes project selection by subaddress optional (#20732).

History

#1 - 2015-10-13 05:22 - Toshi MARUYAMA

- Target version set to 3.2.0

#2 - 2015-10-19 18:58 - Jean-Philippe Lang

- Status changed from New to Closed

- Assignee set to Jean-Philippe Lang

I've made it optional in r14690. A new command line option lets you define which address will be searched for a subaddress in receivers.

Example: --project-from-subaddress redmine@example.com

#3 - 2016-12-25 18:34 - Go MAEDA

- Duplicated by Patch #8905: Support identify project by email address added

#4 - 2018-01-20 06:09 - Go MAEDA

- Related to Patch #28026: "project_from_subaddress" option is not listed in the help of "rake redmine:email:receive_imap" added

#5 - 2018-09-15 09:14 - Go MAEDA

- Related to Patch #8257: Proposal for supporting project-specific wildcard addresses in default mail handler added

#6 - 2018-09-15 09:25 - Go MAEDA

- Related to Feature #13742: Multi project for email incoming added

#7 - 2019-02-09 06:48 - Go MAEDA

- Related to Feature #2768: Ability to Pass The project id for Issue Creation by email added
