Redmine - Feature #21026

Select user-groups in custom fields of type "User"

2015-10-20 08:01 - Dominik Follmann

Description

A custom field of type "User" allows only selection of users, not of user groups.

It would be a useful feature, if we could configure a custom field of type "User" in a way that it allows both, user and user group selection, exactly like the "Assignee" field does.

Most likely this should be an option for the custom field.

Maybe the implementation wouldn't be that much, because the "Assignee" field already has this feature (?).

After applying this patch, groups can also be selected in the user format custom field.
https://redmine.tokyo/issues/911#note-3

Sorry written in Japanese.
But I think the code part will be helpful.

But the patch file? Where i can find?
Thanks
Lorenzo
