Included Redmine::Hook::Helper to ActionController::Base so call_hook is available in all controllers. #2111

History

#1 - 2008-10-30 13:43 - Diego Sousa

i found the problem, in IssuesController i dont get error because of mixin with IssuesHelper and inside IssuesHelper have a mixin with ApplicationHelper that include the Redmine::Hook::Helper that have the method call_hook, TimelogController has a mixin too with TimelogHelper but TimelogHelper dont have a mixin with ApplicationHelper, well instead of mixin every helper i changed the hook.rb file lib/redmine/hook.rb in the last line i add **ActionController::Base.send(:include, Redmine::Hook::Helper)** now all the controllers have the call_hook method.

#2 - 2008-10-30 16:38 - Eric Davis

- Category set to Plugin API
- Status changed from New to 7
- Assignee set to Eric Davis
- Affected version (unused) set to devel

Good research, I knew somewhere the Redmine::Hook::Helper wasn't getting mixed in but I didn't have the time to debug it. I should be able to create a fix for this soon.

#3 - 2008-11-06 06:39 - Eric Davis

- Status changed from 7 to Resolved
- Target version set to 0.8
- % Done changed from 0 to 100
- Resolution set to Fixed

Redmine::Hook::Helper is now included in ActionController::Base so call_hook is available in all controllers. Thank you for your bug report and the research. [r1979](#)
