## History

---

### #1 - 2015-11-11 03:33 - Iijun yin

Server is CentOS 7

```
[root@svra redmine]# ruby --version  
ruby 2.0.0p598 (2014-11-13) [x86_64-linux]
```

### #2 - 2015-11-11 05:49 - Toshi MARUYAMA

- Status changed from New to Needs feedback

Try disable SELinux.

### #3 - 2015-11-11 08:11 - Iijun yin

Before installing, SELinux was disabled.

```
[root@svra redmine]# cat /etc/selinux/config  
  
# This file controls the state of SELinux on the system.  
# SELINUX= can take one of these three values:  
#   enforcing - SELinux security policy is enforced.  
#   permissive - SELinux prints warnings instead of enforcing.  
#   disabled - No SELinux policy is loaded.  
#SELINUX=enforcing  
SELINUX=disabled  
# SELINUXTYPE= can take one of three two values:  
#   targeted - Targeted processes are protected,  
#   minimum - Modification of targeted policy. Only selected processes are protected.  
#   mls - Multi Level Security protection.  
SELINUXTYPE=targeted
```

### #4 - 2015-11-11 08:59 - Toshi MARUYAMA

- Status changed from Needs feedback to Closed

I have no idea and this is not Redmine issue but Rails issue.
