Redmine - Feature #2166

Extend Textile syntax via plugin

Description		
In a plugin I'm currently working on I would like to add custom Textile syntax to Redmine. This could be done with the textile macro support which is how this feature is implemented in Trac.

I just notice this feature is already implemented. Some documentation in the wiki would be nice... :)

Do you mean [#2025](#2025) ?

#4 - 2008-11-14 19:24 - Markus Knittig

Nope, I was referring to the feature to extend the Textile syntax with macros.

+1 We have other ticketing systems we use. I'd like to write a plugin to automatically link to external issues from these systems when somebody writes the ticket number in the description or comment fields.
