#### Description

If you export a issue details that has commits, Redmine throws an error. I think this is because of the change to show.rfpdf in [r2006](#) but I haven't been able to research it.

#### Example issue to export

<https://projects.littlestreamsoftware.com/issues/show/1720?format=pdf>

#### Error details (courtesy of my new plugin :))

A `ActionView::TemplateError` occurred in `issues#show`:

```
can't convert ActiveRecord::Associations::BelongsToAssociation into String
In issues/show.rfpdf
